

OLEG POLIAKOV

Senior Full-Stack Engineer

Product Engineering • UI Architecture • Scalable Back-End Systems

olegpoliakov@outlook.com | [GitHub](#) | [LinkedIn](#) | [Telegram](#)

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer (React + Node.js) with 10+ years of experience building scalable product features, UI systems, and reliable back-end services. Design and deliver complex functionality end-to-end, from architecture to deployment, and thrive in fast-moving startup environments. Solve the right problem before writing code, and build systems that stay maintainable as products grow, not just features that ship.

SKILLS

Programming Languages: JavaScript, TypeScript, C#, PHP

Front-End: React, Redux, Vue, HTML5, CSS3, Sass, Tailwind CSS, Responsive Design

Back-End: Node.js, Express.js, ASP.NET, REST APIs, WebSocket

Databases: PostgreSQL, MySQL, MongoDB, MS SQL

Testing: Mocha, Jest, Vitest, Sinon, Selenium, Puppeteer

Tools & Platforms: Git, GitHub, Docker, Storybook

Build & Tooling: Webpack, Vite

AI-Assisted Development: Claude Code, GitHub Copilot

Engineering Practices: Data Modeling, System Design, Code Review, Refactoring, TDD, DevOps, Component Libraries, Continuous Integration (CI), Continuous Delivery (CD)

WORK EXPERIENCE

FULL-STACK WEB DEVELOPER AT [FAMIRY](#)

09/2022 – 09/2026

Famiry is an online service for compiling and creating interactive family trees.

- Developed a reusable UI component library used across multiple products, improving modularity and reducing development time.
- Built a Notion-like rich text editor for managing structured user content.
- Implemented an interactive map with location search and geotagging features, increasing user engagement.
- Designed a back-end data backup service using queued processing.

- Developed real-time chat functionality with channels and file uploads, enhancing user interaction.
- Built feed-based features for creating and sharing user stories.
- Implemented a photo album creation module.
- Performed large-scale refactoring and resolved complex bugs across the platform, enhancing stability and performance.
- Led architectural design and UI improvements, establishing reusable component standards and scalable system patterns.

Technologies: React, Node.js, PostgreSQL, Docker

FULL-STACK WEB DEVELOPER AT [SAY YES](#)

01/2015 – 09/2022

Say Yes is an English school based in Moscow, Russia.

- Designed and developed landing pages and internal web applications.
- Built and maintained a multi-module platform supporting core business operations.
- Implemented front-end logic and scalable back-end services.
- Participated in architectural decisions and long-term system evolution, contributing to scalable and maintainable solutions.
- Led UI architecture initiatives to improve component reusability and consistency.
- Refactored core services to microservices architecture, improving system scalability and maintainability.
- Introduced event-driven patterns for real-time features, enhancing responsiveness and user experience.
- Set up and maintained servers and Docker-based environments, and configured CI/CD processes for building, testing, and deploying applications.

Technologies: React, Node.js, MongoDB, Docker

FOUNDER, AUTHOR, AND DEVELOPER AT [CODEDOJO](#)

01/2016 – 09/2022

CodeDojo was an online e-learning platform for learning programming and development skills.

- Founded and developed an online e-learning platform for programming education, enabling thousands of users to access learning resources.
- Built front-end modules for browsing courses and educational content.
- Developed back-end services integrating user management and content delivery.
- Maintained and evolved the platform architecture over multiple iterations.
- Established scalable architecture patterns to support platform growth and feature expansion.

Technologies: React, Node.js, MongoDB

HIGHER EDUCATION

GUBKIN RUSSIAN STATE UNIVERSITY OF OIL AND GAS

09/2006 – 06/2011

Specialist Degree – Industrial Management

Diploma thesis: *Economic evaluation of field development project “Vostochno-Perevalnoye” of Khanty–Mansi Autonomous Okrug.*

CERTIFICATES

MICROSOFT CERTIFIED PROFESSIONAL

2016

Exam 70-480: Programming in HTML5 with JavaScript and CSS3

LANGUAGES

Russian — Native

English — Advanced (C1)

Spanish — Beginner
