

OLEG POLIAKOV

Senior Full-Stack Engineer

Product Engineering • System Architecture • AI-Powered Products

olegpoliakov@outlook.com | GitHub | LinkedIn | Telegram

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer (React + Node.js) with 10+ years of experience designing, building, and evolving digital products. Combines hands-on development with system design, technical leadership, and product thinking, having worked both as a founding engineer and within cross-functional product teams. Experienced across front-end, back-end, infrastructure, and AI-powered applications, with a recent focus on RAG and LLM-based product features.

SKILLS

- **Core:** TypeScript, JavaScript, React, Redux, Node.js, Express.js, PostgreSQL, MongoDB, REST APIs, WebSocket
- **AI & LLMs:** LLM integrations, RAG, vector search, embeddings (Qdrant), tool calling, AI agents
- **Infrastructure:** Docker, CI/CD, Git/GitHub
- **Testing:** Jest, Vitest, Mocha, Puppeteer
- **Practices:** System design, data modeling, code review, refactoring, TDD, component libraries
- **AI-assisted development:** Claude Code, GitHub Copilot, OpenAI Codex
- **Also used:** Angular, Vue, C#/ASP.NET, PHP, MySQL, Tailwind CSS, Storybook

WORK EXPERIENCE

FULL-STACK WEB DEVELOPER AT SAY YES

09/2026 – Present

Say Yes is an English school based in Moscow, Russia.

Rejoined the company to lead development of AI-powered learning experiences and product modernization initiatives.

Delivered

- Led the decomposition of the monolithic application into 11 services and introduced event-driven messaging for real-time functionality, including notifications and learning progress updates.

- Established Docker-based infrastructure and CI/CD pipelines for automated build, test, and deployment workflows.
- Designed and implemented an AI-assisted editor prototype that enables teachers to generate and refine educational content using LLM-powered suggestions.

In progress

- Developing an AI tutor and conversational chat experience integrated into the learning platform.
- Building a RAG-based learning plan generator using embeddings, vector search, and Qdrant to deliver personalized learning recommendations.

Technologies: TypeScript, React, Node.js, MongoDB, Docker, Qdrant, LLM Integrations

FULL-STACK WEB DEVELOPER AT FAMIRY

09/2022 – 09/2026

Famiry is an online service for compiling and creating interactive family trees.

- Worked in a product team of 4 engineers alongside a dedicated designer and product manager, delivering features in two-week sprint cycles and participating in planning, code reviews, and technical design discussions.
- Led the design and implementation of a shared React component library adopted across multiple products, establishing reusable UI standards and improving development efficiency.
- Owned the design and implementation of several core platform features, including a Notion-style rich text editor, real-time chat, interactive maps, content feeds, and photo album functionality, delivering solutions across both front-end and back-end systems.
- Designed and implemented scalable backend services, including WebSocket-based real-time communication and asynchronous data processing workflows.
- Contributed to large-scale refactoring initiatives and engineering decisions that improved platform maintainability, scalability, and developer experience.

Technologies: TypeScript, React, Node.js, PostgreSQL, Docker, Storybook

FULL-STACK WEB DEVELOPER AT SAY YES

01/2015 – 09/2022

Say Yes is an English school based in Moscow, Russia.

- Initially worked directly with the founders as the sole engineer, owning product development from requirements to production.
- Designed, built, and maintained a multi-module platform supporting student learning, content management, internal operations, and core business workflows.
- In the final years of the project, partnered with another full-stack engineer, assuming technical leadership responsibilities for architecture, technical planning, and major refactoring initiatives while remaining a hands-on contributor.

- Led the platform's long-term technical evolution over seven years, making architectural decisions, establishing reusable UI standards, and balancing business requirements with maintainability and scalability.

Technologies: JavaScript, React, Node.js, MongoDB, Docker

FOUNDER, AUTHOR, AND DEVELOPER AT CODEDOJO
01/2016 – 09/2022

CodeDojo was an online e-learning platform for learning programming and development skills.

- Founded and developed an online learning platform used by thousands of learners, creating both the educational content and the underlying software.
- Owned the full product lifecycle, including curriculum design, user experience, application architecture, deployment, and ongoing platform operations.
- Designed and built core platform capabilities, including course delivery, user management, content publishing, and learner progress tracking.
- Evolved the architecture through multiple iterations as the platform grew, balancing feature development, maintainability, and operational requirements.

Technologies: JavaScript, React, Node.js, MongoDB

HIGHER EDUCATION

GUBKIN RUSSIAN STATE UNIVERSITY OF OIL AND GAS
09/2006 – 06/2011

Specialist Degree – Industrial Management

Diploma thesis: *Economic evaluation of field development project "Vostochno-Perevalnoye" of Khanty–Mansi Autonomous Okrug*.

CERTIFICATES

MICROSOFT CERTIFIED PROFESSIONAL
2016

Exam 70-480: Programming in HTML5 with JavaScript and CSS3

LANGUAGES

Russian — Native

English — Advanced (C1)

Spanish — Beginner
